- \* an existing published wage determination
- \* a survey underlying a wage determination
- \* a Wage and Hour Division letter setting forth a position on a wage determination matter
- \* a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour Regional Office for the area in which the survey was conducted because those Regional Offices have responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

SECTION 00800 ATTACHMENT FOR ECONOMIC PRICE ADJUSTMENT FOR OPTION YEAR PRICE  
COEFFICIENT.

52.217-9000 Economic Price Adjustment (Job Order Contract)

Application. For job order contracts, insert the following clause in solicitations and contracts in accordance with 17.9004-2(i).

ADJUSTMENTS TO CONTRACTOR'S COEFFICIENT FOR OPTION YEARS  
(JOB ORDER CONTRACTS)

'Pricing' of option periods, to include consideration of any adjustments shall be performed by an economic price adjustment for those periods, as follows:

An economic adjustment will be applied to the contract coefficient(s) addressing changes in the cost of labor, equipment and material in the Unit Price Book (UPB) (this includes consideration of Davis Bacon issues). This allows for economic increase or decrease of the prices in the Unit Price Book (UPB) and serves to adjust line item prices by the percentage increase or decrease of the economic trend in the construction market. The economic price adjustment will be based on the Building Cost Index (BCI) found in the Market Trend pages of the Engineering News Record (ENR). The economic adjustment is not applied to the cost items comprising the coefficient. No upward adjustment shall apply to delivery orders awarded prior to the effective date of the adjustment, regardless of the date of commencement of work thereunder.

The adjustment will be made in accordance with the following equation. The resulting revised coefficient(s) shall be applied throughout the option year.

$$N = C + i$$

Where: N = New Coefficient

C = Base Year Coefficient

i = Change Factor (% increase or decrease from base to option year)

The Index Factor, i, shall be computed according to the following equation:

$$i = \frac{BCI_N - 1}{BCI_C}$$

Where:

BCI<sub>N</sub> is the Building Cost Index, published in the ENR, for the month prior to the effective date of the option period.

BCI<sub>C</sub> is the Building Cost Index, as published in the ENR, on the date of the award of the contract. The BCI<sub>C</sub> is \_\_\_\_\_, based on the award date of \_\_\_\_\_.

If the BCI or the ENR ceases to be published, the parties shall agree on substitute indices.

EXAMPLE: For the base year of a contract the coefficient is 1.10. The cost to the government for a line item whose cost is \$100.00 is 1.10 x \$100.00 = \$110.00.

OPTION YEAR 1. For the first option year the coefficient will be adjusted as follows:

$$i = \frac{BCI_N - 1}{BCI_C} = \frac{3111.86 - 1}{3071.10} = \frac{1.0133 - 1}{-} = .0133$$

The new coefficient would be calculated as follows:

$$N = C + i = 1.10 + 0.0133 = 1.1133$$

The above line item under the option period would be  $1.1133 \times \$100.00 = \$111.33$ .

OPTION YEAR 2. For the second option year, if the BCI for the month prior to the effective date of the option period was 3002.99, the coefficient will be adjusted as follows:

$$i = \frac{BCI_N - 1}{BCI_C} = \frac{3062.99 - 1}{3071.10} = \frac{.9974 - 1}{-} = -0.0026$$

The new coefficient would be calculated as follows:

$$N = C + i = 1.10 - 0.0026 = 1.0974$$

The above line item under the second option period would be  $1.0974 \times \$100.00 = \$109.74$

Note 1. Round calculations for the Change Factor (i) to the nearest ten thousandth.

Note 2. ENR indices for calculation of coefficients for the option years are taken from the McGraw Hill publication, ENR, published during the month prior to the effective date of the option. The ENR Index for the base year (contract award) is the most recent ENR index published for the month prior to initial contract award.

Questions were received on September 6, 2005 at 10:12 PM. The questions and answers are provided below.

1. Question: Is JOC contractor responsible to do any work related to Hazardous material?

Answer: It is possible but not known, see Unit Price Book.

2. Question: Will JOC task order contain lead paint or asbestos removal?

Answer: It is possible but not known, see Unit Price Book.

3. If yes to above, please provide estimated percent and dollar amount of lead paint or asbestos.

Answer: Unknown.

4. Is the completion time for individual Job Order negotiated at the time when given?

Answer: Completion time is identified prior to issuing the task order.

5. Paragraph C.3.3 mentioned requiring the contractor to perform real design. The question is if this Seneca Army Base is closing, why is there a requirement for design? How do we charge for Design built effort? What is the percent of design work required or dollar amount?

Answer: Design could be for example: design for replacement of a heat system that needs to be replaced. Design effort is part of coefficient or cost in Unit Price Book. Design work percentage is unknown but should be minimal.
